

RGB-конвертер BS-350mA (12/48V, 50W)

INTRODUCTION:

The dimmer relay is a long illumination of the LED light intelligent RGB three-color light repeater, used the most advanced PWM (Puls Width Modulation) digital dimming technology; apply to commercial and can be mounted or darkinstalled, using the constant current control technology to extend the LED life, energy saving.

TECHNOLOGY SPECIFICATIONS:

- Input Voltage: DC12V-48V
- Output Power: 42W max
- Input Signal: PWM
- Output Channel: RGB
- Max Load Current: 350mA * 3CH
- Controller Size: 57 x 35 x 22.5 mm

FUNCTIONS:

1. RGB full colour LED light of the repeater.
2. Amplifier control signal.
3. RGB three signals (total positive).
4. Power extender accepts PWM (puls width modulation) control.
5. The optical isolation.

DIMENSION:
